Material :
LLD-PE,
linear low density polyethylene

Standard Colour :
black

CAPTOP Recessed Pipe Caps (RPC) are designed to protect the inside and the bevel of a pipe against damage from impact and corrosion. These RPC contain high density elastomer, which has excellent resistance against impact and ultraviolet exposure.

A heavy bumper inside the RPC gives further protection against bevel damage. Air vents are situated in the end of the protector to stop any buildup of pressure inside the pipe.
